To whoever is reading this message, if you're reading this it means that my phishing email has succeeded in getting you to open this PDF file.

Even as we speak, the malware is spreading to all your files and encrypting them! I hope you're not opening this on a company computer because it means your whole internal network will be infected as well. Woohoo !

Anyways lets get down to business, you know how this goes. Yadda - yadda - yadda give me Bitcoin right ?? Nope, I'm actually here to make a statement. People nowadays have no knowledge on cybersecurity at all and are given false perceptions on hacker culture by media.

=====I LOOK NOTHING LIKE THIS LOL=====

=====

To make this a learning experience, I've hidden the decryption key in this document itself, learn what you can about digital forensics and try to find it, GLHF :D
